

# Specifications

The **Expandable Hybrid** is especially designed for use in situations where a low step height is required. Once detached and installed, the chassis is only 35 cm off the ground. Equipped with a glass wall and sliding doors, you create a transparent and easily accessible space. The Expandable Hybrid, with a total length of 12.5 m, is especially equipped with an internal space to store the axle assembly out of sight after installation. The internal space can be fully integrated in the interior design of the trailer. Our Hybrid can be transported to any desired location by either a

normal or a low-deck truck. And thanks to our hydraulic remote control system we guarantee an easy setup, with just the press of a button.

Expandable Hybrid	 In	 Expanded
Length	12.6 m	12.6 m
Width	2.6 m	4.8 m
Height	3.8 m	3.0 m
